*Claims Allowed*

Claims 1-42 are allowable over the prior art of record. The claims are allowable because the prior art does not anticipate nor render obvious the invention of a control system and method for engaging a gear in an automated manual transmission with a shift collar and a shift rod, wherein the shift rod is moved to a neutral position, engaging an actuation mechanism to produce an initial engagement force on the shift rod, adjusting the rotational speeds of the collar and the selected gear until they reach a predetermined speed differential, modulating the initial engagement force to achieve the predetermined speed differential, and applying a final engagement force to effect full engagement of the selected gear.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

*Prior Art Discussed*

The examiner has considered the references cited in applicant's Information Disclosure Statements, filed April 1, 2004 and April 8, 2004. None of the references show all of the features of the claimed invention.

The references cited by the examiner are deemed pertinent to applicant's disclosure. Tornatore '933 shows a method and apparatus for shifting gears in a transmission but does not appear to show a modulation step. Likewise, Kamiya '704 shows another method and apparatus for shifting gears in a transmission but does not appear to show a modulation step as required by the claims.
